

CORNER CONNECTOR

D

Corner connector is a multi-directional joint that allows strut channels to connect at 90° intersections in multiple directions – typically forming “+” or “T + side” configurations. Its design supports structural rigidity while enabling installation versatility in complex framing or piping systems.

Part No.	For Rail	Size (W×H)	Hole Dia (Ø)	Thickness (mm)	Finish Option
IC30132001	Strut	47 mm × 41 mm	14 mm	5 mm	EG / HDG/ SS
