

FLAT CHANNEL CONNECTOR (U TYPE)

D

Corner connector is a multi-directional joint that allows strut channels to connect at 90° intersections in multiple directions — typically forming “+” or “T + side” configurations. Its design supports structural rigidity while enabling installation versatility in complex framing or piping systems.

| Part No. | h (mm) | T (Nm) | For Rail | T (Nm) ² | Finish Option |
|------------|--------|--------|-------------|---------------------|---------------|
| IC30131005 | 20 | 40 | Strut 41x21 | 40 | EG / HDG/ SS |
| IC30131006 | 40 | 40 | Strut 41x41 | 40 | EG / HDG/ SS |
